

WPS Premium Letterpress Plates for UV-FLEXO APPLICATION

- // Resistant to UV-curable Flexo inks
- // Excellent image reproduction

The water washable WPS Premium Letterpress Plate for UV-Flexo is resistant to UV-curable inks. The plate can be used on narrow web flexo printing presses. All kinds of flexo applications can be printed like labels, plastics and cardboards. Another application is varnishing and spot-varnishing. Image printing on adhesive tape printing is a special application for the UV-Flexo clichés which offers an added value to the product.

Available in analogue and digital versions. The digital version can be laser exposed on all different brands of digital imagers and is giving an even better printing result. A 1% dot can be kept on the plate giving an excellent print result with fading highlights.
