

DELETION FLUID AND ADDITION PENS

DELETION PEN FOR ANALOGUE, THERMAL POSITIVE AND HIGH CHEMICAL RESISTANCE PLATES (HCR).

PROPERTIES

- ▶ Its effective action in removing the coating does not damage the anodic layer, leaving unaltered the water acceptance properties.

APPLICATION

- ▶ Suitable for all types of analogue, thermal positive and high chemical resistance plates (HCR).

METHOD OF USE

- ▶ During plate preparation, apply **DELETION PEN POS** over the area to be corrected, and then wash well with water before gumming.
- ▶ On press it is sufficient to wipe with a wet sponge to remove the remains of the fluid before resuming the print run.

CONSIDERATIONS

- ▶ All residues of the deletion fluid should be removed with water to avoid ink take up in these zones on restarting printing.

PACKAGING

- ▶ Available with fine (F) and wide (G) point.
- ▶ In single units, in boxes of 25 (point F) and 20 (point G).
