

PROTECTION AND STORAGE GUMS

SYNTHETIC GUM SOLUTION FOR USE DURING THE POST BAKE TREATMENT OF ANALOGUE, CTcP AND THERMAL POSITIVE PLATES. DIRECT USE. MEDIUM VISCOSITY.

PROPERTIES

- Protects the hydrophilic areas of the plate from oxidation.
- **GUM T-511** facilitates the correct conditions needed to achieve optimum results in the baking process.
- Its specific formulation is suitable for the baking process due to its resistance to high temperatures without varying its protection characteristics.

APPLICATION

- Automatic processors.
- Hand.

METHOD OF USE

- *Manual: Direct use. Apply the product before baking the plate spreading uniformly over the plate. A thin layer is sufficient to protect the plate.*
- *Automatic processor: Direct use.*

CONSIDERATIONS

- *This gum is eliminated perfectly on printing machine without the necessity of the previous cleaner application.*
- *Avoid accumulation of product in the image areas, which could result in damage on removal.*

PACKAGING

- 10 liters.
