

PROTECTION AND STORAGE GUMS

DIRECT USE SYNTHETIC GUM FOR PLATE STORAGE. AUTOMATIC WASH PLATE SYSTEMS.

PROPERTIES

- ▶ The gum content protects the plate against oxidation during storage.
- ▶ Avoids the formation of scum, degreasing and wetting the non-image areas, it reduces cleaning downtime in the machine.
- ▶ Its specific formulation allows having a thin and homogeneous layer over the plate surface in the automatic wash plate system.
- ▶ It produces a correct free flow in the circulation system of the automatic wash plate system, removing the risk of formation of crystalline deposits.

APPLICATION

- ▶ Automatic wash plate systems.

METHOD OF USE

- ▶ To be used directly.
- ▶ Apply without dilution according to the automatic wash plate system model.

CONSIDERATIONS

- ▶ It is advisable to remove with water any remains of **GUM F-22** from the automatic wash plate system application rolls at the end of the workday. This will avoid possible application problems the following day.

PACKAGING

- ▶ 10 liters.
