

The S-LINE 52 IP is the answer for all round, high quality incremental processing of analogue or digital solvent flexographic plates. Designed with advanced automation in mind, the S-LINE 52 can be supplied with a fully automatic, 8 drawer dryer, light finisher stacker to complete a full, automatic in-liner system (either from new or field retrofitted).

Ergonomics and ease of use are built in as standard with an integrated, programmable plate punch, plate and pin bar holders, easy cleaning solvent systems, volumetric viscosity pump, optional remote access and a pictogram based operating system displayed on a 24cm (9.5") full colour touch screen which provides a new standard in precision setting of processing parameters.

Wash out is achieved with separate black mask removal round brushes section with it's own dedicated solvent tank. Main wash is from 10 round brushes and cleaning 1 (top), 2 (bottom) and 1 wiping brush for the best possible results. All the brushes (except the 2 bottom cleaning brushes) are oscillating and contra-rotating pairs. The unique oscillation mechanism and brush rotation are scalable for the highest quality plate production.

S-LINE 52 IP SPECIFICATIONS

PLATE TYPES	Analogue/Digital Solvent Wash Flexographic Maximum 24 channels plate memory
MAXIMUM PLATE SIZE	1320 x 2030mm (52 x 80")
PLATE THICKNESS	Up to 7mm (0.276")
MACHINE LENGTH	5310mm (209")
MACHINE WIDTH	2200mm (86.6")
MACHINE HEIGHT	1150mm (45")
GROSS WEIGHT	2150Kg (4740lb)
COMPRESSED AIR SUPPLY	7 bar (100 psi)
POWER SUPPLY	400V 3Ph+N+PE 50/60Hz 7.5kW 12A 230V 3Ph+PE 50/60Hz 7.5kW 21A
